

FINAL PROJECT – GET TO KNOW YOUR TEAM

- **What does this team member consider his or her strengths?**

Chelsea Miller - hardworking, willing, logical thinker, plays well with others

Gustavo A Hernandez - Researching, moral thinking, data analytics with Python and SQL and the desire of constant knowledge and improvement.

Henrietta Tudela - Researching, logical thinking, analyzing data once the data has been wrangled

- **What does this team member consider his or her weaknesses?**

Chelsea Miller - Time management, confidence

Gustavo A Hernandez - I have not too much experience with NoSQL.

Henrietta Tudela - Data Wrangling and loss of memory after learning something new. I need to go over the topic several times for it to stick in my brain.

- **How does this team member feel he or she works best? This could be anything from the time of day he or she likes to work to the type of work he or she likes to do, the resources he or she frequently utilizes, or even the best way to communicate with him or her.**

Chelsea Miller - working alone and with others for an end result. when given a list, capable of fulfilling that list. Work at all times of day.

Gustavo A Hernandez - I think that my best way to work is on my own at my time and then give results to the team.

Henrietta Tudela - Independent working considering the time difference with other team members

- **How would the team member like to receive feedback? In an ideal world, feedback would be primarily good - everyone is tackling their assigned tasks with aplomb. But sometimes, things do not run as smoothly. Having a plan in place ahead of time to have these hard conversations is smart!**

Chelsea Miller - direct feedback, positive and constructive criticism.

Gustavo A Hernandez - Following the plan and with comments and suggestions would be ideal.

Henrietta Tudela - Touchbases on areas of weakness, communication is a plus
